Community Cohesion : a shared contextual statement

The following statement outlines both the data and current issues relating to ethnicity, religion/belief and socio-economic factors of the community of Holland Moor Primary School. As an inclusive school we ensure that pupils are able to access the curriculum, make progress and encourage full participation in activities that are on offer to them

Ethnicity /culture context of the school [local and national]

Holland Moor School serves a majority white British community and

Has below the national average of pupils with a heritage background other than white British. There are no pupils who are learning English as an additional language.

Religion/belief context of the school [local and national]

The school community celebrates the main festivals of the major world religions. The pupils are encouraged to share their own faith and learn about other people's faiths. They are taught about other faiths and the pupils visit other local churches, the local mosque and the Indian temple as part of their curriculum work.

Socio-economic context of the school [local and national]

The deprivation indicators of the school are broadly in line with the national average, however, the free school meal eligibility is above the national average. The school currently has 80% of the pupils in the 30% SOA.

Current issues affecting cohesion at school [local and national level].

Racist incidents have been historically rare at school and pupils generally mix well between the different groups within the school community. We have not identified any issues that affect cohesion at school, local and national level.
